

## **Solenis Background Information**

### **Our Mission**

At Solenis, we strive to stay ahead of our customers' next challenge. By matching customers with the right people, bringing the right experience and offering the right technology, we build deep partnerships to ensure trusted solutions and results that our customers value.

### **Our Company**

Formerly Ashland Water Technologies, Solenis is a new name for a company with decades of experience that extends to Betz Laboratories, Drew, Stockhausen and Hercules. Acquired by a fund managed by Clayton, Dubilier & Rice, the company delivers innovative chemical technologies that solve critical customer challenges. Rooted in "solutions" and "genesis," the new name speaks to our mission to be the source – the genesis – of all solutions.

Solenis is a highly respected manufacturer of specialty chemicals for the pulp, paper, oil and gas, chemical processing, mining, biorefining, power and municipal markets. Our product portfolio includes a broad array of process, functional and water treatment chemistries as well as state-of-the-art monitoring and control systems. These technologies are used by our customers to improve operational efficiencies, enhance product quality, protect plant assets and minimize environmental impact.

In addition, our front-line sales, applications and service teams work side by side with our customers to diagnose challenges and design innovative solutions that fuel customer success.

Our reputation for solving highly complex customer challenges quickly and precisely is directly attributed to 3,500 passionate professionals that work together across 118 countries and five continents to deliver highly effective solutions. Our global presence encompasses 30 manufacturing facilities and an array of geographies, cultures, technologies and industries, which contribute to the breadth of experience and expertise our team of professionals brings to every task.

## **Our Stewardship**

Solenis remains focused on environmental sustainability and stewardship with respect to our products, our facilities and the communities we serve. We regularly review the environmental impact of our products and manufacturing processes and evaluate renewable and sustainable resources, as we strive to protect or improve the environment while providing solutions that meet ever-tightening environmental regulations.

## **Our Future**

Although we're proud of our reputation and the strong heritage that supports it, our elite team of water and process experts continues to press forward. We are constantly adapting and staying ahead of the curve, combining team expertise with data-driven technology to build trust among our customers, solve their challenges and maintain our leadership role in the industry, always with an eye to redefining how water and process solutions are delivered.
