

DEOSAN®

SPECIALIST HYGIENE

Robot Milking

Cleaning

For Superior cleaning in these specialist areas use a combination of these proven Deosan products to achieve the best milk quality results.

Deosan Liquid CIP

High strength, specially formulated and proven caustic based liquid.

- High caustic delivering robust and effective clean
- Designed for use in water hardness areas
- Dilute at 200ml per 40 litres of water
- Premium chlorine free option

Deosan Phos Clean Duo

Highly effective acid clean and descaler based on phosphoric acid to ensure compatibility with all surface types found in the milking parlour.

- Low foaming and free rinsing
- Use rate can be varied according to cleaning / descaling requirement and routine
- Designed for recirculation, but also suitable for manual soak or spray applications
- Suitable for most surfaces, e.g. glass, rubber and stainless steel

Deosan Activ

Highly effective with consistent performance oxidising disinfectant based on peracetic acid. Regulated and specifically formulated for these applications.

- Highly effective oxidising peracetic acid disinfectant
- For terminal disinfection and cluster dipping
- Free rinsing and non tainting
- Final rinsing 0.6 - 1 ml / litre
- Cluster disinfection 3ml / litre

Udder

Deosan Triathlon

- New generation natural teat disinfectant, 100% milk safe, 100% efficient, 0% risk
- RTU Post milking disinfectant
- Delivers Log 5 bacteria kill
- Proven to improve teat moisture retention for unrivalled skin condition
- Exfoliates and removes dead skin cells
- Produces a fine spray pattern for total teat skin coverage
- BPR licenced

Deosan Target Teatfoam Plus

- Ready to use pre and post milking teat disinfectant
- 6000ppm chlorhexidine - delivering enhanced performance before and after milking
- Efficiency tested: Bacteria: S.aureus, S.uberis, E.coli (EN1656) and Yeast (EN1657)
- Exceptional soil removal and skin conditioning qualities
- All year round premium skin protection

Deosan Activate PVP Plus

- Ready to use sprayable post milking disinfectant
- Activate surfactant and film former complex offers optimum cling protection to all areas of the teat and ensures that the biocide seeks out and delivers unbeatable bacterial kill
- On-going protection between milking
- High emollient content produces excellent teat skin condition
- BPR licenced

OPC - External Robot Cleaning

It is paramount that the areas on, around and underneath the robot are kept clean and disinfected to ensure the delivery of hygienic milk. It also promotes the on-going efficiencies of the robot operation.

EnduroSafe

- Unique detergent used extensively in high risk food production sites
- 100% soft metal safe
- EnduroPower – generates high level foam with the cling of a gel
- Ensures high surface retention prolonging contact time for exceptional cleaning
- Interacts quickly with rinse water to rinse away easily and completely
- Time effective wash solution

Lameness Control

Deosan HH+

- Hardens hoof to defend against bacteria
- Unique acid formulation - 100% soluble
- Kinder to animal and environment than traditional footbath options
- Low cost in use
