

## SafePack XL

Safe, ergonomic transport and storage system for liquid detergents

### A clean, safe working environment for your staff

SafePack XL provides integrated spill containment for maximal user safety. The 200L container is designed to be easy maneuverable. The special base construction makes transportation with a forklift truck or pallet lifter a simple operation.

With the patented coupling system and built in suction pipe, changing a SafePack XL is done in a few seconds without spillages, and without chemical residues or waste.

SafePack XL is offered with most mechanical warewashing products.

## Safe, ergonomic transport and storage system for liquid detergents

### Safety in use and storage:

- Built in suction pipe
- Safety labeling clearly visible on the drum.
- Integrated spill containment
- Very robust packaging
