TASKI® QuattroSelect®

Highly efficient dilution platform for medium to large size building care operations

Searching for a solution for cleaning your large site, which requires simple implementation, full control, safety and speed? Designed for multiple users and different product requirements, QuattroSelect includes trigger sprays, buckets and/or scrubber driers filling at different dilution rates and speed. With QuattroSelect, Building Care cleaning has never been so easy, safe and fast!

Improves your efficiency

The QuattroSelect dilution station always delivers the right dilution, so there is no unnecessary re-work due to over or under dosing. It also delivers optimal filling speed with low flow bottle filling and high flow bucket and scrubber drier filling.

Increases your safety

QuattroSelect is a closed system, so there is no possibility of contact between concentrated chemicals and your employees. It can additionally be fully locked.

Simplifies your operation

QuattroSelect has the option of four concentrated chemicals with four different dilutions. All chemicals and accessories are colour coded, easy to operate and extremely reliable.

Improves your environmental footprint

Two 2.5 L QuattroSelect pouches are capable of delivering up to 2,500 L of the same product in ready to use format. This means savings from transporting and storing the product and also less packaging waste, so kinder for the environment. Daily cleaning range also available with EU Ecolabel certified concentrate.

Benefits of dilution control

- 100% control of consumption and cost dilution guarantees predictable consumption and costs and always the right dilution rates.
- 100% safe dilution guarantees that your employees will not get into contact with the concentrated chemicals.
